EXPERIENCE

Full Stack Software Engineer 06/2025 - Present

ShareRoost

- Architected and developed a serverless web application from the ground up using React, Python, and AWS, transitioning the project toward an official LLC launch.
- Engineered an automated, cost-effective media processing pipeline utilizing AWS Lambda and S3 to handle user uploads, transcoding, and thumbnail generation.
- Designed a fully responsive, mobile-friendly frontend architecture using React and Bootstrap to optimize the user experience and interface consistency.

Software Engineer (Game Developer) 01/2024 - 05/2024

Changeling VR

- Led an engineering team in the full-cycle development of a virtual reality application using Unreal Engine, C++, Blueprints, and Perforce.
- Architected and maintained the codebase for two simultaneous projects, establishing technical documentation and system design standards to streamline future development.
- Analyzed user testing data and rapidly iterated on core features, resulting in an increase to over 85% positive user sentiment.

Front End Angular Developer Intern 06/2022 - 09/2022

AVEVA

- Engineered scalable frontend features for AVEVA Insight, an enterprise cloud platform for industrial data visualization, using Angular and TypeScript.
- Standardized both unit and E2E testing using Jest and Cypress, significantly improving CI/CD pipeline consistency.
- Debugged key frontend components and widgets, promoting user stability and reliability of backend communication.
